Catheter Stabilization Device
Read carefully before use

Safety and Efficacy Considerations:
- Single use only. Rx only. **STERILE EO** Sterile by ethylene oxide.
- Do not resterilize. Do not use if package is damaged.
- Product code, **LOT** lot number and **EXP** expiration date information – see packaging.

Do not alter the StatLock® stabilization device or components. Procedure must be performed by trained personnel with knowledge of anatomical landmarks, safe technique and potential complications.

LATEX FREE

Indications for Use:
The StatLock® stabilization device is a stabilization device for compatible winged catheters. Multiple pad and retainer designs are available. Choose the StatLock® stabilization device indicated for the tube or catheter to be secured.

Contraindications:
Known tape or adhesive allergies.

Warnings and Precautions:
1. Do not use the StatLock® stabilization device where loss of adherence could occur, such as with a confused patient or non adherent skin.
2. Observe universal blood and body fluid precautions and infection control procedures, during application and removal of the StatLock® stabilization device.
3. SUTURE THE STATLOCK® STABILIZATION DEVICE PAD TO SKIN IF DESIRED OR DEEMED NECESSARY.
4. Avoid contact with alcohol or acetone, both can weaken bonding of components and the StatLock® stabilization device pad adherence.
6. Remove oil and moisturizer from targeted skin area.
7. The StatLock® stabilization device pad adherence and catheter/tube position should be routinely inspected.
8. Orient the StatLock® stabilization device so point of triangular pad, head of teddy bear pad, or arrow point toward catheter tip.
9. The StatLock® stabilization device should be replaced at least every 7 days.

Application:
1. **PREP**: Prepare targeted area using alcohol, to remove oil and moisturizer, allow to dry completely, and apply skin prep for skin protection and enhanced adhesion. ALLOW TO DRY COMPLETELY. ALWAYS CONNECT THE STATLOCK® STABILIZATION DEVICE TO CATHETER BEFORE ADHERING PAD TO SKIN.
2. **PRESS**: Before applying the StatLock® stabilization device pad to skin, secure tube or catheter to the StatLock® stabilization device retainer.
3. **PEEL**: Peel off paper backing, and
4. **PLACE**: Place the StatLock® stabilization device on targeted skin one side at a time.

Note:
- The StatLock® stabilization device pad can be adhered after X-ray confirmation of proper catheter/tube position.
- Apply adhesive strip to central venous catheters for added security during dressing changes involving the StatLock® stabilization device.

Removal:
Carefully remove overlying dressing using stretch technique and sutures (if applicable).
1. **DISENGAGE** catheter/tube from the StatLock® stabilization device retainer.
2. **DISSOLVE** the StatLock® stabilization device adhesive with alcohol swab while gently lifting the StatLock® stabilization device pad.
3. **DOCUMENT** the StatLock® stabilization device dressing change in the patient chart.
4. **DISPOSE** of all equipment in appropriate containers.

Monitor the StatLock® stabilization device daily and replace when clinically indicated, at least every 7 days.
