Put the Power of IJ in your Practice
Bedside Placement for Vascular Access Specialists
Introducing a portfolio of POWER injectable central venous catheters for Internal Jugular and other central vein access sites, designed for YOUR PRACTICE.

When forearm or upper arm vascular access is not recommended or your patient has inadequate or compromised peripheral veins, there is now an alternative designed especially for vascular access specialists.

This offering enables:

- **Bedside CVC placement using Modified Seldinger Technique (MST)**
- **Compliance with Joint Commission**, **IHI**, and **CDC initiatives** through the use of maximal barrier components
- **Gentle plugging of the insertion site by the catheter reverse taper**

### Ordering Information
**PowerHohn® Central Venous Catheters**
