**THE POWER OF PURPLE™**

The PowerHohn™ provides enhanced over the wire placement due to catheter design, construction and material.

The PowerHohn catheters allow injection of contrast media for power injection computed tomography scans at a maximum of 5 cc/sec and a power injector alarm setting at a maximum of 300 psi.

The reverse taper hub gently plugs the insertion site and provides superior kink resistance.

PowerHohn catheters with the VitaCuff Antimicrobial Cuff help reduce the possibility of infection in the tunnel tract.

PowerHohn catheters incorporate an exclusive bifurcation design and are clearly labeled to differentiate them from non-power injection catheters.

**BASIC TRAY**

**CONTENTS:**
- Reverse Taper Polyurethane Radiopaque Catheter
- Dilator
- Guidewire
- Injection Cap(s)
- Needle, Introducer
- Scalpel
- Syringe
- Tunneler

**FULL TRAY**

**CONTENTS:**
- Reverse Taper Polyurethane Radiopaque Catheter
- ChloraPrep One Step Applicator
- Dilator
- Drape, Absorbent
- Drape, Fenestrated
- Dressing, Transparent
- Filter Straw Device
- Gauze
- Guidewire
- Injection Cap
- Lidocaine
- Mask
- Needle
- Needle Holder
- Ointment
- Scalpel
- Syringe
- Surgical Tape
- Suture
- Towel, Absorbent
- Tunneler
